

CAXTON

Caxton Joins the Debate: The Telegraph's Cyber Security Conference. London.15-16 May

Business leaders linked up at this conference looking to gain practical and strategic advice on how to keep their enterprise safe online. With an audience of 300 professionals across two days, delegates learned how protect their businesses against sophisticated ransomware attacks and ensure their customer data strategies are compliant with GDPR governance.

Caxton CEO, Rupert Lee-Browne.

'A view from the bridge; how Caxton deals with cyber threats'.

During his 20 minute address, Rupert commented, 'There is no doubt that there are greater cyber threats now than ever before – and it is only going to get more complex, not less so.

'The rise of AI as a tool for speeding up penetration by criminals is going to make the job of keeping them out ever harder. And the potential cost of this is vast, there are any number of corporates that have already been struck – I'm sure you all know the examples.

'So the big question, what is the best way into our systems? Well it's the best way into any system. Through people. People are the biggest vulnerability - they tend to make mistakes with all the best intentions and are surprisingly trusting – just what the hackers want.

'So, just to conclude, we are all in very uncertain times – the speed of criminal activity means that no one can afford to rest on their laurels – and whilst security of systems is one thing, people are our real vulnerability – and we need to train them all properly to play their part in their company's security' he said.

Biography. Rupert Lee-Browne

Rupert is the founder and CEO of Caxton FX, the international payments company. From a bootstrapped startup in 2002, he has driven the Caxton business towards being one of the UK's finest entrepreneurial success stories. Prior to establishing Caxton, Rupert launched a number of successful innovative businesses in the finance and media sectors, all with a focus on new technology. Rupert is now innovating payment solutions by investing in smart blockchain tech both within Caxton and in other businesses. Keen to champion today's technology entrepreneurs, he regularly features in the press and speaks at industry events.
