

Lead .NET/C# Developer/Architect

Caxton FX is looking for a hands-on Lead Developer/Architect to join the agile development team, and develop customer facing and back office systems to support our innovative trading platform.

This is a great opportunity to join a leading and forward thinking fin-tech company, and make an impact at an exciting period of international growth.

About the company

Caxton FX is a foreign exchange company that has become an entrepreneurial success story. From launch our ethos has been to offer excellent value for money and great customer service. Our growth is testament to the fact that we have delivered on that vision from day one.

Caxton FX was founded in 2002. Since then, it has grown from one man and a phone to a business that turns over circa £750 million. Our analysts are widely quoted in the UK press on currency issues and with over 200,000 clients, we remain focused on delivering excellent customer service. Caxton FX has been defined as one of the 50 businesses leading Britain based on outstanding growth at a pace 73 times greater than the National Average.

At the heart of our success is our people. Caxton FX is a people business and our successful growth has largely been a result of the outstanding relationships we have established with our growing base of customers.

The Caxton culture is open, honest, hardworking, professional and fun. With approximately 100 staff the company is going through an important growth phase which is focused on new product launches and geographical development. We want to hire the very best people to support our ambitious growth plans. Through educational and training initiatives we support each individual throughout the development of their career with the intention of stretching each one to a high standard of excellence.

The role

Reporting to the IT Director, you will be developing using an end-to-end Microsoft stack utilising the latest Microsoft bleeding edge cloud technology, whilst providing technical leadership of a fast paced team and directly contributing to the growth of the business.

Key outcomes:

- Design innovative solutions that reflect Caxton FX's core values of Simplicity, Service and Security
- Deliver quality code within the estimated timescales, and actively identify system defects and design and implement solutions
- Build excellent working relationships within the IT department and the wider business

It is essential that you have at least 5 years experience in an agile team using scrum, and in developing web applications using Microsoft ASP C# for MVC 3-5. You will also have experience in using GIT as a version control system, and developing using Visual Studio 2013 and WCF services using IIS/WAS.

All applicants must be eligible to live and work in the UK.
