

Scrum Master

We are looking for an experienced Scrum Master to join the agile IT development team and ensure that new products and IT systems are delivered to the agreed budget, timescale and quality, in line with needs of the business.

This is a rare opportunity to work on market disruptive projects within a dynamic fin-tech FX company at an exciting period of international growth. The Scrum Master is key to delivering all the new products and services we want to offer to our clients.

Reporting to the IT Director and working closely with Product Owner/ Business Analyst, you will be responsible for the successful live implementation of all new IT services and applications both client facing and back office.

This is a hands-on technical project management role that will form the bridge between the business and the IT team. You will enjoy immersing yourself into the detail both of new and existing business processes and the IT systems that you will deliver to support those processes. Ultimately, you will hold a sphere of influence and have an opportunity to shape the business moving forward.

Key Requirements

- Managing the development teams day to day tasks by holding stand-ups and monitoring progress
- Running sprint planning sessions to accurately estimate the sprint capacity
- Working with the product owner to groom the backlog for delivery in time with the business strategy
- Working with the tech lead to split features into tasks ready for development
- Assuring quality control of user stories and tasks
- Owning the development process in terms of delivery train
- Focusing the team on delivering the most essential features at a pace that meets the business demands whilst maintaining the quality of the product
- Delivering changes to a complex transactional enterprise system without impacting performance or uptime
- Working with the product owner to managing the expectations of the business stream owners

Skills & Experience

- Excellent working knowledge of JIRA
- At least 5 years working in a small agile development team delivering bespoke software
- Quality assurance of user stories
- FX trading knowledge (would be advantageous, but not essential)
- .Net Stack Exposure (would be advantageous, but not essential)

About the company
